Professional Summary

Software Engineer with 3+ years of experience building and operating SaaS platforms, APIs, and cloud-based systems. Currently developing payroll and HR technology at Runa, one of Latin America's leading HR platforms. Experienced across backend development, cloud infrastructure, distributed systems, observability, database optimization, and product delivery.

Core Technologies

Ruby on Rails • React • PostgreSQL • AWS • Kubernetes • Docker • MongoDB • Redis • Python • Go

Professional Experience

Software Engineer — Runa HR (Jan 2023 – Present)

- Develop and maintain mission-critical payroll and HR systems used by thousands of companies across Mexico.
- Design and implement backend services, APIs, integrations, and customer-facing product features.
- Build solutions for payroll automation, tax calculations, compliance workflows, reporting, and employee management.
- Improve platform reliability, scalability, and performance through database and infrastructure optimization.
- Operate production environments running on AWS, Kubernetes, PostgreSQL, MongoDB, Redis, and Datadog.

Key Achievements

- MVP Award (2023)
- Everyday Hero Award (2024)
- MVP Award (2025)

Freelance Software Engineer (Jan 2023 – Present)

Developed travel booking platforms, automation systems, integrations, and cloud-native applications using FastAPI, Next.js, Go, Python, AWS, and Ruby on Rails.

Nautical Officer — Golar LNG (Jul 2019 – Oct 2022)

Responsible for vessel navigation, safety management, cargo operations, and emergency response aboard LNG carriers operating internationally.
